Total Team Solutions Now Offering Employers Improved Health Insurance Benefits

After a thorough review of health insurance benefit providers, Total Team Solutions, the Trumbull-based professional employer organization, has forged an exclusive business partnership with Anthem Blue Cross Blue Shield. As a result, employers that utilize Total Team Solutions will have access to more health care coverage options. Many clients will be able to reduce their health insurance expenses while improving employee benefits. Specifically, the TTS/Anthem partnership means:

- More flexible, affordable PPO health plans without requiring a primary care physician
- Access to 17,000+ primary and specialty physicians and health care providers
- Online customer service available 24/7
- Incentive programs that encourage employee wellness
- Discounts on health-related services like health club memberships and weight control programs

“We studied the best health benefit programs out there and, for our small to midsize clients, Anthem came out on top,” says TTS President Rob Lynn. “We know these new programs will reduce most employers’ medical insurance expenses, improve employee health care, and help increase company morale.”

The TTS/Anthem partnership, which becomes active September 1, 2006, presents employees with an unusually wide variety of choices. Some employees may select health savings accounts, some select a high-end benefit program, and others could choose among the other alternatives in between. “This type of flexibility is not typical in the small to midsize business market,” Lynn says.

Since 1988, Total Team Solutions has enabled small and midsize businesses to concentrate on their core business by providing a variety of human resource outsourcing services. TTS offers Fortune 500 quality employee benefits including payroll services, health and dental insurance, 401(k) and college savings plans, workplace risk management, and more to employers with 5 to 250 employees.
